

Business Solutions

Leverage cost-effective, streamlined deployment of packaged services.

...specialized services, efficient implementation...

SecureData 365's compliance, secure computing, and office systems solutions help your organization quickly implement required functionality, without the need to build, staff, or operate your own specialized environment and operations staff.

Offerings

- Compliance: PCI compliant hosting and audit.
- Secure Computing:
 - Certificate-based security; managed PKI.
 - DR, business continuity and storage
- Office Systems: Secure e-mail; file servers.

Benefits

- Eliminate setup-cost expenditure.
- Streamline implementation processes reducing time to market.
- Leverage existing expertise and processes.
- Maintain organization's focus on core competency.

SecureData 365 Advantages

- Experienced staff with in-depth knowledge of solutions.
- Key compliance activities integrated directly into staff's operational processes.

Choose from SecureData 365's business solution offerings to help your business maximize deployment of precious capital and resources. Our compliance, secure computing, and office systems services allow your business and technology teams to focus their time and attention on your market, products, and competition.

SecureData 365 offers:

- Secure Computing:
 - Advanced PKI services allow you to implement certificate-based security and authentication; fully managed PKI root services are also available.
 - DR, business continuity and business storage solutions.
- Compliance: PCI, SOX, and HIPPA compliant hosting – either physical or virtual environments.
- Office Systems: Secure e-mail hosted using Microsoft Exchange.
