- Fortune 200 staff with decades of advanced technical experience.
- Industry certifications, including: CISSP, CISM, SANS, MCSE, and SANS instructor.

Why SecureData 365?

Why should SecureData 365 be the preferred destination for your mission-critical computing infrastructure? Because:

- Each and every experienced professional at SecureData 365 considers it their personal responsibility to fully support our customers' business.

"SecureData 365 was started in 2007 after realizing that there were no suitable hosting facilities available for Delta in Ohio. As one of the primary visionaries of SecureData 365, it is a great feeling to now be a customer. I now sleep better at night and give 100% of my attention to my core business knowing that my servers are in good hands in a state-of-the-art facility that is managed by the best data center team in Ohio."

– M. Minard

CEO, Delta Media Group
Founder, SecureData 365

- Our state-of-the-art data center leverages advanced and proven technology to ensure that it is the one of the most reliable in the industry.
- Our operations rely on proven, ITIL standards-based best practices to maintain consistent, effective, and efficient daily processes that are externally audited and validated.

- We manage our data center with the right

tools to provide smooth and responsive operations, continuous monitoring, and detailed analysis and reporting.

- We are dedicated to partnerships with key industry resources and leverage their expertise to provide our clients with the best possible solution.
- We strive to ensure that all of our clients become active champions and ambassadors for our services and solutions.

Our Vision

SecureData 365's data center was designed from the ground up to provide a fault-tolerant, technically advanced, and inherently secure environment for your computing equipment. We back up our state-of-the-art facility with professionally managed services, experienced staff, and a total dedication to client satisfaction.

As SecureData 365 continues to grow, our entire team is dedicated to helping you benefit from our commitment to:

- Protect our customers' most valuable information assets with advanced security and network infrastructure.
- Continually strive to engage our customers in a productive partnership.
- Make smart facilities investments that expand and scale our facilities to meet our customer's needs.
- Stay current with our industry's latest technology and trends that leads to better support the customer's business.
- Cultivate a rich, interconnected ecosystem of top partners, consultants, and technology providers, in order to provide our customers with optimal solutions.
